Description

Sebago is a performance fabric that can remove difficult stains such as ink, mustard, wine and others with only a dry cloth. It uses Zenus technology that applies multiple layers of skin on top of the textile to create a solid surface without sacrificing the look and touch of the fabric.

The solid skin prevents moisture, stains and other foreign materials from entering the textile layer.

Zenus has eliminated the use of anti-microbials, PFOA/ PFOS, and other harmful chemicals to create an environmentally conscious textile.
