Acoustics » Acoustic Baffles

Uniform Span is the deepest of the range at 6.7" (170mm). Featuring 9 baffles for exceptional sound absorption in larger, high-impact interiors.

Description	<p>Zintra Box Baffles Systems are prefabricated, ceiling-mounted systems that bring rhythm, dimension, and high-performance acoustics to any space. Suspended in perfectly spaced rows, the box-shaped design not only looks substantial but also improves sound absorption, capturing noise within and increasing the NRC rating. Lightweight, modular, and scalable, these systems are easy to assemble, easy to install, and a visually striking alternative to traditional mineral fibre ceilings.</p> <p>Uniform Span Box Baffle Systems</p> <p>Introduces greater depth at 6.7" (170mm), and 9 baffles per system for a bold yet balanced ceiling design. Its wider profile captures more sound within each baffle, boosting acoustic performance while creating strong architectural lines. Uniform Span is ideal for larger areas where designers want presence and rhythm without excessive density.</p> <p>Available in two sizes, 39" (1000mm) w x 94.5" (2400mm) d and 93" (2362mm) w x 94.5" (2400mm) d, Uniform Span is ideal for projects that call for subtle impact with strong acoustic performance.</p> <p>Design Options</p> <p>Choose from uniform or mixed Box Baffle Systems to suit your design vision. Uniform Slim, Wide, Span, and Grand offer clean, linear profiles, while Freeform layers Slim, Wide, and Span for subtle variation. Fusion combines all four sizes for bold, architectural statements.</p> <p>With a wide array of designs, Zintra Box Baffles are ideal for large, noisy spaces such as educational institutions, shopping centres, restaurants, and airports, where performance meets aesthetic appeal.</p>
